

Shear stress

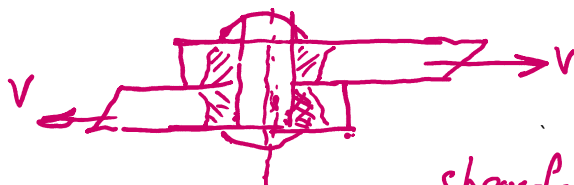

$[\tau]$

due to

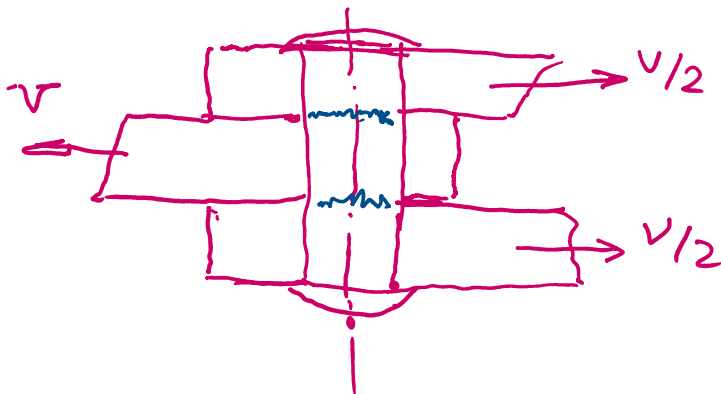

shear force (V)

Torsion
 T

Direct shear σ_R transverse shear

$\tau = \frac{V}{A}$ — shear force
 $\leftarrow$ cross sectional area

$\tau = \frac{V}{2A}$

$$\tau = \frac{VQ}{It}$$

$V_x \Rightarrow I_y$

$V_y \Rightarrow I_x$

V : shear force
 Q : 1st Moment of area
from one side
of the Neutral N.A.
