Answer the following questions:

A. For the continuous casting answer the following:

The Typical products are:

The Material of the mold used is:

The Main advantages of the process are:

.....
.....

The types of continuous casting machines are:

.....
.....
.....

B. Mention 5 characteristic properties of sand stands for sand casting

.....
.....
.....
.....
.....

C. Show what is meant by green sand, dry sand molding sand, backing sand, facing sand, parting sand, and core sand.

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

D. Indicate the importance of the term "casting yield"

.....
.....

تأكد من تسجيل الإسم ورقم الفصل باللغة العربية بخط واضح (استخدم ظهر ورقة الإمتحان للحل عند الحاجة لذلك)

[1] Calculate [F] the force needed to break the Joint

[5 Marks]

Weld Size = 10 mm & SMAW Electrode E7018 , Note that: [1 Ksi = 6.89 MPa] & [$\tau = \sim 0.6 \sigma$]

Weld Throat $t_w =$

[mm]

Weld Area Subjected to Shear: $A_s =$

[mm²]

Joint Shear Strength: $\tau =$

[MPa]

Force needed to break the Joint: $F =$

[N]

[2] Explain) the Elements of Welding Symbol

[5 Marks]
